

Reports requirements

SQLsafe leverages Microsoft SQL Server Reporting Services (Reporting Services) to provide on-the-spot reporting on your backup and restore data. The Report Server computer should meet or exceed the hardware and software requirements recommended by Microsoft to run and manage the Reporting Services components.

SQLsafe supports Reporting Services version 1.0 or later and requires Microsoft Internet Explorer version 6.0 or later. You can generate SQLsafe reports on both 32-bit and 64-bit Report Servers.
