

Subscribing to Alerts

[Click here for 1.0 Documentation](#)

Idera SQL Elements can send email notifications for warning or critical conditions from your environment, in order to receive these notifications you have to subscribe to alerts.

To subscribe, go to the **Administration** tab, in the **Alert Emails** section click **Subscribe to alerts**.

The screenshot shows the Idera SQL Elements Administration interface. The top navigation bar includes DASHBOARD, EXPLORER, INSTANCES, and ADMINISTRATION (highlighted with a red box). The ADMINISTRATION section contains several sub-sections: Users, Licensing, Instances, Tags, Alert Emails, and Health Checks. The Alert Emails section is highlighted with a red box, and within it, the 'Subscribe to alerts' link is also highlighted with a red box. Other links in the Alert Emails section include 'Configure email (SMTP) settings' and 'Manage Subscriptions For All Users'.

On the **Subscribe to Alerts** window, check the respective box and type the email address where you want to receive these notifications.

The 'Subscribe to Alerts' dialog box is shown. It has a title bar with a question mark and a close button. The main content area has a checkbox labeled 'Receive SQL Elements alert emails for critical issues such as availability problems.' which is checked. Below this is an 'Email address' field containing 'bob@email.com'. At the bottom, there is a red box containing the text: 'Email settings have not been configured yet. Click here to configure sending alert emails.' To the right of this box are 'OK' and 'CANCEL' buttons.

Note

If you have not configured your email settings, SQL Elements displays **Email settings have not been configured yet. Click here to configure sending alert emails**, click this option and fill the required fields, for more information go to [Configuring email settings for alert notifications](#).

Manage users

You can also manage your subscriptions from the following sections:

- [Manage Users.](#)
- [Manage Subscriptions For All Users.](#)
