

Disable database monitoring

You can disable the monitoring of a database if you no longer want to collect information from this database or receive its health check recommendations.

To disable an instance database, go to the respective instance details view, click the gear icon next to the database you no longer want to monitor, and select **Disable Monitoring**.

To enable a database again, look for the same gear icon next to the disabled database, and choose **Enable Monitoring**.

The screenshot shows the IDERA SQL Inventory Manager interface. The 'ADMINISTRATION' tab is active. The 'TOP DATABASES BY SIZE (MB)' chart shows 'msdb' as the largest. The 'TOP DATABASES BY ACTIVITY (TRANSACTIONS/SEC)' chart shows 'master' as the most active. Below these charts is a table of databases. The 'msdb' database is highlighted, and a context menu is open showing options: 'Edit Tags', 'Disable Monitoring', and 'Decommission'. The 'Disable Monitoring' option is selected. On the right, the 'INSTANCE SUMMARY' and 'SERVER SUMMARY' panels are visible.

Database	Status	Recommendations	Type	Data Size (MB)	Log Size (MB)	Activity (Trans/Sec)
IderaDashboardRepository	Online	2	User	3.3	3.1	0
master	Online	2	System	4.0	0.8	1
model	Online	2	System	2.3	0.5	0
msdb	Online	2	System	14.8	17.8	0
ReportServer	Online	2	User	3.3	6.1	0
ReportServerTempDB	Online	2	User	2.3	0.8	0
SQLInventoryManagerRepository	Online	2	User	6.3	7.6	0
tempdb	Online	0	System	11.8	2.8	1
