

View Configuration Settings

IDERA SQL Inventory Manager provides you a view of the configuration settings for the SQL Server instances that you choose to monitor. The configuration settings window shows you the global configuration settings for the selected SQL Server instance.

To access this information, go to the **Instance Details** view. On the right sidebar of the window, on the **Instance Summary** section, click **View Configuration Settings** and IDERA SQL Inventory Manager opens a window with the configuration settings of the respective instance.

The screenshot shows the IDERA SQL Inventory Manager application. In the top navigation bar, the user is logged in as 'simpsons\administrator'. The main menu includes 'OVERVIEW', 'EXPLORER', 'INSTANCES', and 'ADMINISTRATION'. The 'INSTANCES' tab is selected, and the instance 'AUT-2000-003\SQL2000' is highlighted. The left pane displays 'INSTANCE DETAILS' for this instance, showing 4 health check recommendations (4 databases do not have a backup) and an application named 'Microsoft SQL Server Management Studio (Added Manually)' last seen on Sep 26, 2016 at 6:39:37 PM. Below this are two charts: 'TOP DATABASES BY SIZE (MB)' and 'TOP DATABASES BY ACTIVITY (TRANSACTIONS/SEC)'. The 'TOP DATABASES BY SIZE (MB)' chart shows msdb (28.2 MB), tempdb (23.3 MB), Northwind (2.0 MB), pubs (1.8 MB), and model (1.0 MB). The 'TOP DATABASES BY ACTIVITY (TRANSACTIONS/SEC)' chart shows model (100%), msdb (80%), Northwind (50%), pubs (30%), and tempdb (20%). At the bottom, it says 'DATABASES (5 databases | 28.2 MB total size)'. The right pane contains the 'INSTANCE SUMMARY' section, which includes details like the server edition (SQL Server 2000 RTM (8.0.194.0) Enterprise Edition), memory (Maximum Memory: 2,147,483,647 MB, Minimum Memory: 0 MB), port (Port: 0), clustering (Clustered: No), and database statistics. A red box highlights the 'View Configuration Settings' link under 'SQL Licensing Comments'. The 'SERVER SUMMARY' section shows the host server as 'AUT-2000-003' and the 'TAGS' section indicates 'No Tags Found'.

The **Configuration Settings** window shows you the following information:

- Property Name
- Running Value
- Configured Value
- Description

Configuration Settings

Instance AUT-2000-003\SQL2000

Property Name	Running Value	Configured Value	Description
affinity mask	0	0	affinity mask
allow updates	0	0	Allow updates to system tables
awe enabled	0	0	AWE enabled in the server
c2 audit mode	0	0	c2 audit mode
cost threshold for parallelism	5	5	cost threshold for parallelism
cursor threshold	-1	-1	cursor threshold
default full-text language	1033	1033	default full-text language
default language	0	0	default language
fill factor (%)	0	0	Default fill factor percentage
index create memory (KB)	0	0	Memory for index create sorts (kBytes)
