Install SQLsafe Backup Agent

You can remotely deploy the SQLsafe Backup Agent from the Management Console to SQL Server instances across your enterprise.

To install a SQLsafe Backup Agent:

1. In the navigation pane, click **SQLsafe Agents**.
2. Right-click on the computer in question in the tree pane.
3. Click **Install SQLsafe Backup Agent** from the context menu.
4. Choose whether you want to install the SQLsafe XSP. You can also enable or disable the option for installing SQLsafe Agent Extended Stored Procedures.
5. Click **OK**.

SQLsafe is a high-performance backup and recovery solution for your SQL Servers. Learn more > >
