

# Review details for manual backup

The Summary tab of the SQL Safe Backup wizard provides the summary of specified values and options you have selected in the Backup Wizard.

## What do you do next?

After you have reviewed the information on the Summary tab, click **Backup** to submit the backup job immediately, or click **Generate Script** to create a script you can use to run the job at a later time. For more information about generating scripts, see [How script generation works](#).

## How do you verify the status of your backup?

If you chose to run the backup job immediately, and want to verify a successful run, you can view its status using the **Instance View**. For more information, see [View backup/restore operation status](#).

## What actions can you perform on the Summary tab?

Action	Steps
Immediately backup databases	Click <b>Backup</b> , and then highlight the instance or database in the tree pane to see the status of the operation.
Create a CLI backup script	Click <b>Generate Script</b> , and then click <b>Command Line</b> . To <b>Save the script to a file</b> , click the saving icon or the <b>Copy script to clipboard</b> icon respectively. SQL Safe creates a backup script using the settings you specified for the selected databases. You can use this script to perform future backups of any system or user database you selected. Click <b>Close</b> to return to the Backup Wizard.
Create a T-SQL backup script	<p>Click <b>Generate Script</b>, and then click <b>T-SQL</b>. To <b>Save the script to a file</b>, click the saving icon or the <b>Copy script to clipboard</b> icon respectively. SQL Safe creates a backup script using the settings you specified. You can use this script to perform future backups of any system or user database you selected. Click <b>Close</b> to return to the Backup Wizard.</p> <p>This script requires the SQL Safe XSP. For more information on installing the SQL Safe XSP, see <a href="#">Deploy the SQL Safe XSP</a>. For more information about how to use the SQL Safe XSP, see the sample scripts available from the Programs menu.</p>

SQL **Safe** is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
