Reviewing details for manual backup

When you reach the **Finish** section of the Backup Wizard, you can go to previous sections and make any necessary changes.

You can also click **Generate Script** to have SQL Safe generate T-SQL and Command Lines of your backup operation settings.

After you have reviewed the information, click **Finish** to submit the backup job immediately.

How do you verify the status of your backup?

If you chose to run the backup job immediately, and want to verify a successful run, you can view its status in the **Operation History** tab.

SQL Safe is a high-performance backup and recovery solution for your SQL Servers. Learn more > >
