

Using the Restore Wizard

SQL Safe web console allows you to access the **Restore Wizard** from the following sections:

- **Home** tab
- **Instances** tab
- **Databases** tab

When you click the **Restore** option from any of the previous locations, SQL Safe prompts you to choose a restore operation for **Database(s)** or **Object Level Recovery**.

If you want to perform a restore operation for **Database(s)**, the **Restore Wizard** will open with the following sections:

- [Target](#)
- [Databases](#)
- [Backup Sets](#)
- [Database Files](#)
- [Recovery State](#)
- [Restore Type](#)
- [Notifications](#)
- [Finish](#)

If you want to perform a restore operation for **Object Level Recovery**, click [here](#).

Take into account that the Restore option is not available for **Guest** role users.

SQL **Safe** is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
