

Deploy SQL Compliance Manager in a clustered environment using Windows Server 2008 and later

The following instructions guide you through the installation of IDERA SQL Compliance Manager in a Windows Server 2008 and later based clustered environment. Be sure to have the following information available before creating the generic service:

- Name of the disk containing the folder
- SQL IP address
- SQL network name
- SQL Server service

Follow the steps described in the links below to complete the installation of SQL Compliance Manager in a Windows Server 2008 and later clustered environments

1. [Install SQL Compliance Manager Collection server on cluster nodes](#)
2. [Register SQL Compliance Manager Collection server as a clustered resource](#)
3. [Install the IDERA Cluster Configuration Console](#)
4. [Deploy the SQLcompliance Agent to cluster nodes](#)
