List security changes performed by specified users.
- Database Schema Change History**  
List all schema changes made to specified databases.
- Host Activity**  
List all activity for specified hosts.
- Login Creation History**  
List all login creation activity.

**Reporting Services**

- Deploy Reports**  
Deploy reports and linked reports to Reporting Services 2005 or later.
- View Deployed Reports**  
View deployed reports hosted by Reporting Services 2005 or later.

A filter can include a list of wildcards, separated by commas, where a wildcard is a string, which may contain asterisks. The following parameters are specific to the selected report and enable you to filter the data to include in the report.

## Available actions

### Server Instance

Allows you to select a registered instance on which you want to report. Select **ALL** to report on all instances.

### Start Date

Allows you to select the start date for the range from which you want to report.

### End Date

Allows you to select the end date for the range from which you want to report.

### Start Time - Hour

Allows you to select the exact starting hour of the day for the range from which you want to report.

### Start Time - Min

Allows you to select the exact starting minute of the day for the range from which you want to report.

### Start Time - AM/PM

Select between AM or PM from the drop down list to configure the Start Time for Each Day range from which you want to report.

### End Time - Hour

Allows you to select the exact ending hour of the day for the range from which you want to report.

**End Time - Min**

Allows you to select the exact ending minute of the day for the range from which you want to report.

**End Time - AM/PM**

Select between AM or PM from the drop down list to configure the End Time for Each Day range from which you want to report.

**Alert Level**

Choose to filter alerts by their different levels; Severe, High, Medium, or Low.

**Run Report**

Click this button to Run the report.

## Default columns

**Time**

The Time column displays the date and time when the event was captured.

**Alert Level**

The Alert Level column displays the level the alert is configured to.

**Source Rule**

The Source Rule column provides the name of the alert rule that generated this alert.

**Rule Name**

The Rule Name column displays the name of the alert rule.

**Computer Name**

The Computer Name column displays the name of the local computer.

**Server Instance**

The Server Instance column displays the name of the Instance Server where the event was captured.
