

Upgrading to this release

Before installing 2.1, make sure:

- ☐ To backup your previous IDERA Enterprise Job Manager Repository and Core Repository
- ☐ Your environment meets the [hardware](#) and [software](#) requirements for installing SQL Enterprise Job Manager.
- ☐ Ensure you have the [required accounts and permissions](#).

To install SQL Enterprise Job Manager 2.0, follow these steps:

- Open the installer, SQL Enterprise Job Manager notifies you that you are upgrading to a new version and asks you if you are certain of this action. Click **Yes** to proceed with the upgrade.
- Install version 2.1. You can point the installer to previous 2.0 repositories. Go to [Installing SQL Enterprise Job Manager](#) for more information.

SQL [Enterprise Job Manager](#) monitors and manages your SQL Server agent jobs. [Learn more](#) > >
