How to enable/disable security

SQL Enterprise Job Manager supports authentication between internal services, this feature is disabled by default. You can enable/disable security, making the following changes in the configuration files:

IDERA Core

Go to the *IDERACoreServices.exe.config* file available at: *%installationfolder%\IDERA\SQL\Enterprise Job Manager Core\IDERACoreServices.exe.config*

Change <value>false</value> to true to enable authentication.

```
<setting name="EnableSecurity" serializeAs="String">
        <value>true</value>
    </setting>
```

SQL Enterprise Job Manager

Go to the *SQLEnterpriseJobManagerService.exe.config* file available at: %installationfolder%\IDERA\SQL\Enterprise Job Manager\CollectionService\SQLEnterpriseJobManagerService.exe.config.

Change <value>false</value> to true to enable authentication.

```
<!--Security-->
<add key="EnabledSecurity" value="true"/>
```

UI: web.properties

This feature is enabled by default, to change it, go to *%installationfolder%\ IDERA\SQL\Enterprise Job Manager\WebApplication\IDERA-main\conf\web.properties*

Change "EnableAuthenticationForRest = true" to false to disable authentication.

> If you change the configuration files, you need to restart the services.

SQL Enterprise Job Manager monitors and manages your SQL Server agent jobs. Learn more > >
