

# How to enable/disable security

SQL Enterprise Job Manager supports authentication between internal services, this feature is disabled by default. You can enable/disable security, making the following changes in the configuration files:

## IDERA Core

Go to the *IDERACoreServices.exe.config* file available at: %installationfolder%\IDERA\SQL\Enterprise Job Manager Core\IDERACoreServices.exe.config

Change `<value>>false</value>` to `true` to enable authentication.

```
<setting name="EnableSecurity" serializeAs="String">
    <value>true</value>
</setting>
```

## SQL Enterprise Job Manager

Go to the *SQLEnterpriseJobManagerService.exe.config* file available at: %installationfolder%\IDERA\SQL\Enterprise Job Manager\CollectionService\SQLEnterpriseJobManagerService.exe.config.

Change `<value>>false</value>` to `true` to enable authentication.

```
<!--Security-->
<add key="EnabledSecurity" value="true"/>
```

## UI: web.properties

This feature is enabled by default, to change it, go to %installationfolder%\IDERA\SQL\Enterprise Job Manager\WebApplication\IDERA-main\conf\web.properties

Change "EnableAuthenticationForRest = true" to false to disable authentication.

If you change the configuration files, you need to restart the services.

SQL **Enterprise Job Manager** monitors and manages your SQL Server agent jobs. [Learn more](#) > >
