

Creating a new Job Chain

You can create new job chains from the following sections:

- **Home** tab - click **Add Job Chain** in the top bar options
- **Jobs** tab - select **Job Chains** from the options on the top right corner, then select **Add Job Chain** on the top section

In the **Job Chain Wizard** you can define the following properties for your new Job Chain:

- [Job Chain General Specifications](#)
- [Root Job Schedules](#)
- [Job Chain Alerts](#)

 Take into account that only Administrators and Guest-users can add new job chains.

SQL [Enterprise Job Manager](#) monitors and manages your SQL Server agent jobs. [Learn more](#) > >
