

# Job Overlap Viewer

You can find the **Job Overlap Viewer** on the top right corner options of any specific Job details view. To access the Job details view of a job, click the name of the job in the **Jobs** tab.

The **Job Overlap Viewer** allows you to see which jobs are overlapped: running or scheduled to run at the same time across your registered SQL Server instances.

## What information can you see in the Job Overlap Viewer?

For those overlapped jobs you can view the following information:

- **Instance name** - overlapped jobs across different instances in your environment
- **Start time** - the start time of the overlapped jobs
- **End time** - when each job finished executing
- **Duration** - the duration time for each job
- **Overlapping job** - the name of the job

Additionally, on the top right corner you can find the following information:

- **Total overlap events** - a counter of the total number of overlapped jobs
- **Total overlap** - the total amount of time the events are overlapped.

## How can you filter and organize your information in the Job Overlap Viewer?

On the left section of the Job Overlap viewer, you can select the Overlap Period. Specify a day and use the slider for a specific time range.

Additionally, you can filter the information available on this view with the following options:

- **Instance name** - select the instances for which you want to view overlapped jobs
- **Job name** - specify the job for which you want to view conflicted events
- **Duration** - use the time slider to define a job duration for which you want to view overlapped events

To export the information on this view, use the **Export** option and select your preferred format: CSV, PDF, or XML.

SQL **Enterprise Job Manager** monitors and manages your SQL Server agent jobs. [Learn more > >](#)
