

Installing using a remote Dashboard

This section guides you through the installation of IDERA SQL Inventory Manager using a remote Dashboard. You can install IDERA SQL Inventory Manager on any computer that meets or exceeds the [product requirements](#).

Before you install IDERA SQL Inventory Manager, be sure to have:

- The path to a remote IDERA Dashboard installation. IDERA SQL Inventory Manager integrates with the IDERA Dashboard.
- A local administrator account on the machine you are installing the product.
- A host machine for SQL Inventory Manager services.
- A host SQL Server for the product databases.
- A service account with permissions to read/write and create databases and update their schemas.

 A remote installation only registers IDERA SQL Inventory Manager with a remote IDERA Dashboard, IDERA SQL Inventory Manager is installed in the local computer.

 You can also grant IDERA SQL Inventory Manager Product Administrator permissions in the IDERA Dashboard. For more information, see [Managing users in the IDERA Dashboard](#).

Installing IDERA SQL Inventory Manager with a remote IDERA Dashboard

Before you install IDERA SQL Inventory Manager, be sure to meet the requirements mentioned before. Open the installer and follow these steps:

1. On the **IDERA SQL Inventory Manager Setup** window, click **Next** to continue with the installation. You can optionally generate a script for generating the SQL Inventory Manager Repository database.
2. You must verify that the Firewall allows TCP (Transmission Control Protocol) traffic through **The ports you want to use**. By default, IDERA SQL Inventory Manager uses ports 9275 and 9291 for the Collection and Web Application services respectively. To see or edit the default ports SQL Inventory Manager uses click **view the list of required ports**.
3. Read the License Agreement. If you agree, click **I accept the Terms and Conditions** and then click **Next**.
4. If you want to change SQL Inventory Manager default installation path, click **Browse**.
5. Set a display name for SQL Inventory Manager.
6. Select **Use remote IDERA Dashboard installation** and provide a Dashboard URL using the format **http://<location of IDERA Dashboard>:9292**. PORT 9292 is the port for REST services.
7. Enter the administrator credentials for accessing the remote IDERA Dashboard installation.
8. Click **Next**.

The screenshot shows the 'IDERA SQL Inventory Manager Setup Wizard' window. The title bar includes the IDERA logo and the text 'IDERA SQL Inventory Manager Setup Wizard'. On the left, a sidebar lists four steps: 1. Install Directory (highlighted in blue), 2. Create Repositories, 3. Service Accounts, and 4. Review and Install. The main area is titled 'Where do you want SQL Inventory Manager and IDERA Dashboard files installed?'. It contains two sections: 'SQL Inventory Manager' and 'IDERA Dashboard'. Under 'SQL Inventory Manager', there is a text box for 'Installation Folder' with the path 'C:\Program Files\Idera\SQLInventoryManager' and a 'Browse' button, followed by a 'Display Name' field with an information icon. Under 'IDERA Dashboard', there are two radio buttons: 'Install or upgrade locally' and 'Use remote IDERA Dashboard installation' (which is selected). Below the selected radio button, there is a text box for 'Enter existing IDERA Dashboard URL' with an information icon, followed by 'Dashboard Administration Credentials' which includes 'Domain\UserName' and 'Password' text boxes. At the bottom left is a link for 'Installation Help' with a question mark icon. At the bottom right are 'Back', 'Next', and 'Cancel' buttons.

9. Specify a SQL Server Instance host and a database name for creating the SQL Inventory Manager Repository database.

By default, the setup program uses your Windows logon account to create and access the Repository database. If you want to use Microsoft SQL Server connection credentials, select **Use Microsoft SQL Server Authentication** and enter your SQL Server credentials.
