

View Computer Details

Idera SQL Inventory Manager provides you with the computer details of your SQL Server instance host machines.

To access this information, go to the **Instance details** view, and review the information in the Server Summary section. Click **View Server Details** or click the name of the **Host Server** and SQL Inventory Manager opens a window with the respective computer details. Also note the custom inventory fields included above the **View Server Details** button. Click the pencil icon to change this value. For more information about this feature, see [How to manage custom inventory fields](#).

The screenshot displays the Idera SQL Inventory Manager interface. The top navigation bar includes 'DASHBOARD', 'SQLINVENTORYMANAGER(SIM181)', and user information 'Welcome Simpsons\Administrator'. The main content area is titled 'INSTANCE DETAILS' for 'AUT-2005-003\SQL2005'. It features a 'HEALTH CHECK RECOMMENDATIONS' section with three items: '6 databases do not have a backup.', '6 databases consistency has never been checked.', and 'Instance AUT-2005-003\SQL2005 configured to allow xp_cmdshell use.' Below this is an 'APPLICATIONS' table listing various SQL Server tools and their last seen dates. The 'TOP DATABASES BY SIZE (MB)' and 'TOP DATABASES BY ACTIVITY (TRANSACTIONS/SEC)' sections use horizontal bar charts to show database performance. On the right, the 'INSTANCE SUMMARY' and 'SERVER SUMMARY' sections provide detailed server information, including version, memory, and configuration settings. The 'View Server Details' button is highlighted in the bottom right corner.

Application Name	Data Last Seen
Microsoft SQL Server Management Studio	Sep 8, 2015 10:25:49 AM
Microsoft SQL Server Management Studio - Query	Sep 8, 2015 10:25:49 AM
SQL diagnostic manager Collection Service	Sep 8, 2015 10:25:49 AM
SQLAgent - Alert Engine	Sep 8, 2015 10:25:49 AM
SQLAgent - Generic Refresher	Sep 8, 2015 10:25:49 AM

Database	Size (MB)
SQLdmMo...	105.0
tempdb	8.5
msdb	6.2
master	4.5
model	1.7

Database	Activity (Transactions/Sec)
tempdb	3
master	2

On this window you can get the following information:

- **Computer information**
 - Computer name
 - Full computer name
 - Domain
- **Windows information**
 - Windows version
- **System information**
 - Manufacturer
 - Model
 - Computer Type
 - Physical and Logical CPUs
 - Physical Memory
 - Number of Network Interface Cards (NICs)
 - CPU Name
 - CPU Speed
 - Whether the computer is clustered
- **Drive information** - All drives, type, their capacity, and respective free space.
- **Hosted instances** - All instances hosted by this computer, if they are clustered, and their active and passive nodes.

Computer Details

Computer Information

Computer name: AUT-2005-003

Full computer name: AUT-2005-003

Domain: simpsons.qa

Windows Information

Microsoft Windows Server 2008 R2 Enterprise

Build: 6.1.7600

Drive Information

Drive	Type	Capacity	Free Space
C:	Fixed	39.9 GB	17.9 GB

Hosted Instances

Instance	Clustered	Active Node	Passive Node
AUT-2005-003\SQL2005	No	AUT-2005-003	

System Information:

Manufacturer: VMware, Inc.

Model: VMware Virtual Platform

Computer Type: Virtual

Physical CPUs: 2

Logical CPUs: 2

Physical Memory: 4.0 GB

NICs: 2

CPU Name: Intel(R) Xeon(R) CPU E5645 @ 2.40GHz

CPU Speed: 2394 MHz

Clustered: No
