Policy Wizard - Select which resource checks you want to run before running the policy

The **Resource Check** tab allows you to select which checks SQL Defrag Manager performs before running a policy. These checks define the conditions that allow a policy to execute. If the conditions are met, SQL Defrag Manager runs the policy.

The following columns of information are available on the **Resource Check** tab.

Name

Select the check box next to the name of the resource check to apply it to this policy.

Comparison

Select how the resource check evaluates the value for this type:

- Numeric comparisons
  - is equal to
  - is not equal to
  - is greater than
  - is greater than or equal to
  - is less than
  - is less than or equal to
- Alphanumeric comparisons
  - is equal to
  - is not equal to
  - contains
  - does not contain
  - starts with
  - does not start with

Value

Type the value to which the resource check compares data.

Leave the **Executing Job Name** resource check value empty to prevent the policy from running when any other job is running.

Details

Describes the resource you want SQL Defrag Manager to check.

Resource Check Options

Allows you to **Verify Server Support** for the Resource Checks previously established to run the policy. You can also set the policy to cancel automatically if the resource checks prevent it from running for a defined period of time.
