

Managing users in SQL Elements

In order for any user to have access to Idera SQL Elements web interface, you need first to grant them access.

Go to the **Administration** tab, and click the **Manage Users** option located on the **Users** section.

A new window opens for managing users and subscriptions opens with the following options:

- Add user
- Edit user
- Remove user

On this window you can also see a list of all registered users with their respective email addresses and if they are subscribed to alerts.

Add user

You need to add users in order to give them access to SQL Elements. To add users, follow these steps:

- Type the name of the user you want to have access to SQL Elements. You should enter a Windows user name in the following format: **<domain\user>**. SQL Elements uses Windows authentication to validate users.
- Check the respective box if you want this user to receive alert emails for critical issues.
- Type the respective email address where you want the user to receive alert emails.
- Click **SAVE**.
- You should provide the new user with the following URL: **http://<ServerName>:9276** (where ServerName is the name of the machine on which you installed the SQL Elements services).

Add User

User Name:

domain\Bob

Note: Enter user's Windows account using the form "domain\username".

Alert Subscriptions

☒ Receive SQL Elements alert emails for critical issues such as availability problems.

Email address:

bob@email.com

 Email settings have not been configured yet. Click here to configure sending alert emails.

SAVE

CANCEL

 If you have not configured your email server settings yet, SQL Elements displays the message **Email settings have not been configured yet.** Click [here to configure sending alert emails](#). Click this option to configure your settings. For more information, go to [Configuring your email settings for alert notifications](#).

 Users must be existing **Active Directory users**. Newly added users should use their Windows user account with their respective passwords to log in to the SQL Elements.

Edit user

This option allows you to edit a user name, enable or disable alert notifications for that user, and change the respective email address.

To enable this option, select one user from the list of users, click **Edit User**. You can also click directly on the name of the user you want to edit and SQL Elements opens the respective dialog window.

On the Edit User screen you can change:

- User name
- Email address
- Alert subscription

After you make your changes, click **Save**.

Edit User

User Name:

domain\Bob

Note: Enter user's Windows account using the form "domain\username".

Alert Subscriptions

☒ Receive SQL Elements alert emails for critical issues such as availability problems.

Email address:

bob@email.com

 Email settings have not been configured yet. Click here to configure sending alert emails.

SAVE

CANCEL

If you have not configured your email server settings yet, SQL Elements displays the message **Email settings have not been configured yet.** [Click here to configure sending alert emails.](#) Click this option to configure your settings. For more information, go to [Configuring your email settings for alert notifications](#)

Remove user

If you need to remove a user or several users, check the box next to the user or users you want to remove. Click **Remove user**.

 **Tips**

Add users to grant them access to the SQL Elements user interface. SQL Elements uses Windows authentication to validate users so enter the user name in the form "domain\username". Users log in to SQL Elements using their Windows credentials.

For each user, select whether they will receive alerts emails from SQL Elements and enter the email address to which they want the alert emails sent.

Manage Users and Subscriptions

[Add User](#) | [Edit User](#) | [Remove User](#)

	User Name	Email Address	Subscribed to Alerts
<input checked="" type="checkbox"/>	domain\Bob	bob@email.com	Yes
<input checked="" type="checkbox"/>	SA		No
<input type="checkbox"/>	ServiceUser		No
<input type="checkbox"/>	SPI\administrator		No

CLOSE

If you remove a user, they will no longer be able to log in to SQL Elements.
