Get started

To get started with SQL Business Intelligence Manager, make sure to follow the checklist below.

	Getting started checklist.
✅	Make sure to meet Software and Hardware requirements.
✅	Run the **Setup.exe** file from the root folder of the installation kit to install the IDERA Dashboard and the SQL Business Intelligence Manager.
✅	Log in to the IDERA Dashboard.
✅	Use the **Welcome to IDERA SQL Business Intelligence Manager** wizard to configure your settings *(this option is only available on your first installation).*
✅	Add BI service instances (SSAS, SSRS, SSIS) for BI monitoring.

After SQL Business Intelligence Manager and IDERA Dashboard are successfully installed you will be able to:

- Configure the e-mail settings to receive an alert notification by e-mail.
- Manage users and grant access to the IDERA Dashboard and SQL BI Manager.
- Get a complete overview of your SQL Business Intelligence environment.
