Disable an Event Filter

You can disable filtering on audit data from a specific SQL Server instance or database. When you disable filtering, SQL compliance manager stops excluding the specified events from your audit data and leaves the event filter intact. SQL compliance manager continues auditing SQL Server events on the specified instances and databases.

To permanently remove an Event Filter from the Repository, delete the filter.

To disable an Event Filter:

1. Navigate to **Event Filters** in the **Administration** tree.
2. On the **Event Filters** tab, select the filter you want to enable, and then click **Disable Filter**.

SQL Compliance Manager audits all activity on your server. Learn more > >
