

# Attach Archive Database window

This window allows you to open an archive database so you can view and report on previously collected audit data.

## Available fields

### Archive Database

Allows you to select which archive database you want to attach. To view all available databases on the registered SQL Server instances, click **Show all databases**.

### Archive Information

Provides general information about the archive database you selected, such as the name of the corresponding SQL Server instance and the last date the archive was updated.

SQL **Compliance Manager** audits all activity on your server. [Learn more](#) > >
