

# Administration tools

The SQL Admin Toolset contains the following administration tools:

## Connection String

Create connection strings in seconds by picking and choosing from the available options.

## Database configuration

Compare and edit configurations for one or more SQL Server databases.

## Database Mover

Move or copy databases and their associated logins within or between SQL Server instances.

## Job Editor

View and edit jobs across multiple SQL Server instances.

## Job Mover

Copy or move your jobs between SQL Servers.

## Linked Server Copy

Copy linked servers from one SQL Server instance to another.

## Login Copy

Synchronize logins across SQL Server instances by copying logins from one instance to another.

## Multi Query

Execute and manage queries across multiple SQL Server instances.

## Partition Generator

View existing partition information and generate new data partitions quickly and easily.

## Quick Reindex

Review index fragmentation and rebuild indexes on your SQL Server instances.

## Server Configuration

Compare and edit configurations for one or more SQL Server instances.

## User Clone

Create a new SQL Server login using an existing login as a template.

SQL **Admin Toolset** delivers 24 essential administration tools. [Learn more](#) > >
