

Data Compare Excluding Database Objects

You can exclude specific tables or views from data compare by listing them under the xml element <TablePairs> or <ViewPairs>.

Rules for excluding database objects are as follows:

- The attribute Action of <Pair> element should be set to Exclude
- The left and right object must be both specified for each excluded pair

The following xml fragment excludes the tables HR.EMPLOYEES and HR_COPY.EMPLOYEES from the comparison:

```
<TablePairs>
  <Pair Action="Exclude">
    <LeftObject Name="HR.EMPLOYEES"></LeftObject>
    <RightObject Name="HR_COPY.EMPLOYEES"></RightObject>
  </Pair>
  <Pair Action="Exclude">
    <LeftObject Name="HR.EMPLOYEES"></LeftObject>
    <RightObject Name="HR_COPY.EMPLOYEES"></RightObject>
  </Pair>
</TablePairs>
```
