Get a quick overview of enterprise health

Use the **All Servers** tab on the Dashboard view to quickly see the overall health of each registered server, based on the last analysis run. From this tab, you can also access quick links to the common tasks for a server such as updating the SQL Doctor settings, reviewing wait stats, or analyzing a query.

SQL Doctor displays the registered server status in its own pane, with links to the corresponding tasks.

SQL Doctor provides complete SQL performance tuning. Learn more > >
