## Show me the problem

The **Show me the problem** button launches the SQL Viewer window with the SQL text associated with the recommendation highlighted. Click **Copy** to copy the SQL text to the clipboard so you can view the text in a text editor or in SQL Server Management Services.

## Access the Show me the problem

To access the Show me the problem window, view the list of recommendations for a SQL Server instance. Select the appropriate row, and then click **Show** me the problem.

SQL Doctor provides complete SQL performance tuning. Learn more > >
