

Archive Properties Window - Default Permissions tab

The Default Permissions tab of the Archive Properties window lets you control the default permission settings at the archive database.

Available fields

Default Database Permissions

Allows you to set the default permissions on the selected archive database. Keep in mind that login permissions will be applied along with the permissions you grant at the archive database level. You can select one of the following default permissions:

- Grant permission to view events and associated SQL statements
- Grant permission to view events only
- Deny permission to view events or SQL statements

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
