

Add SQLcompliance Agent Service wizard - General tab

The General tab of the Add SQLcompliance Agent Service wizard lets you to specify which virtual SQL Server you are planning to audit. The virtual SQL Server is any SQL Server instance hosted by this cluster node. Specifying a virtual SQL Server allows you to begin auditing SQL events generated by activity on this instance. Use the Management Console to specify which server and database events you would like to audit.

Specify the virtual SQL Server you want to audit, and then click **Next**.

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
