

Explore Activity - Instance View

The Explore Activity Instance view displays the status of audit activity for a particular SQL Server instance in your environment. Use the statistics and graphs from the Summary tab to identify server-level issues, or to configure your desired server-level settings. Use the Event Alerts and Data Alerts tabs to drill on your on specific details of your previously generated Event and Data Alerts. In addition, you can also visit the Audit Events tab to analyze the collected database events, or the Archived Events tab to view your archived databases.

The screenshot shows the IDERA SQL Compliance Manager interface. The left sidebar lists 'Audited SQL Servers' with a tree view including 'WIN-N2' and its sub-instances. The main window is titled 'WIN-N2' and has tabs for 'Summary', 'Event Alerts', 'Data Alerts', 'Audit Events', and 'Archived Events'. The 'Summary' tab is active, showing a 'Server Status' section with a green checkmark and 'OK' status. It displays 'Last Heartbeat' as 3/11/2019 5:27 PM, 'Last Archived' as Never, 'Processed Events' as 0, and 'Recent Alerts' as 0. Below this is an 'Audit Configuration' section showing 'Server - Failed Logins', 'Privileged Users - None', 'Trusted Users - None', 'Databases - 12 of 12', and 'Event Filters (2) - Category, Database, Login Name, Session Login'. The 'Server Activity Report Card' section shows 'Event Alerts' with a list of categories (Logins, Logouts, Failed Logins, Security, DDL) and a graph for 'Event Alert Activity' which is currently disabled. The 'Recent Audit Events' table is empty, showing 'No audit events within the selected span.' The bottom of the interface has a navigation bar with 'Explore Activity', 'Audit Reports', and 'Administration'.
