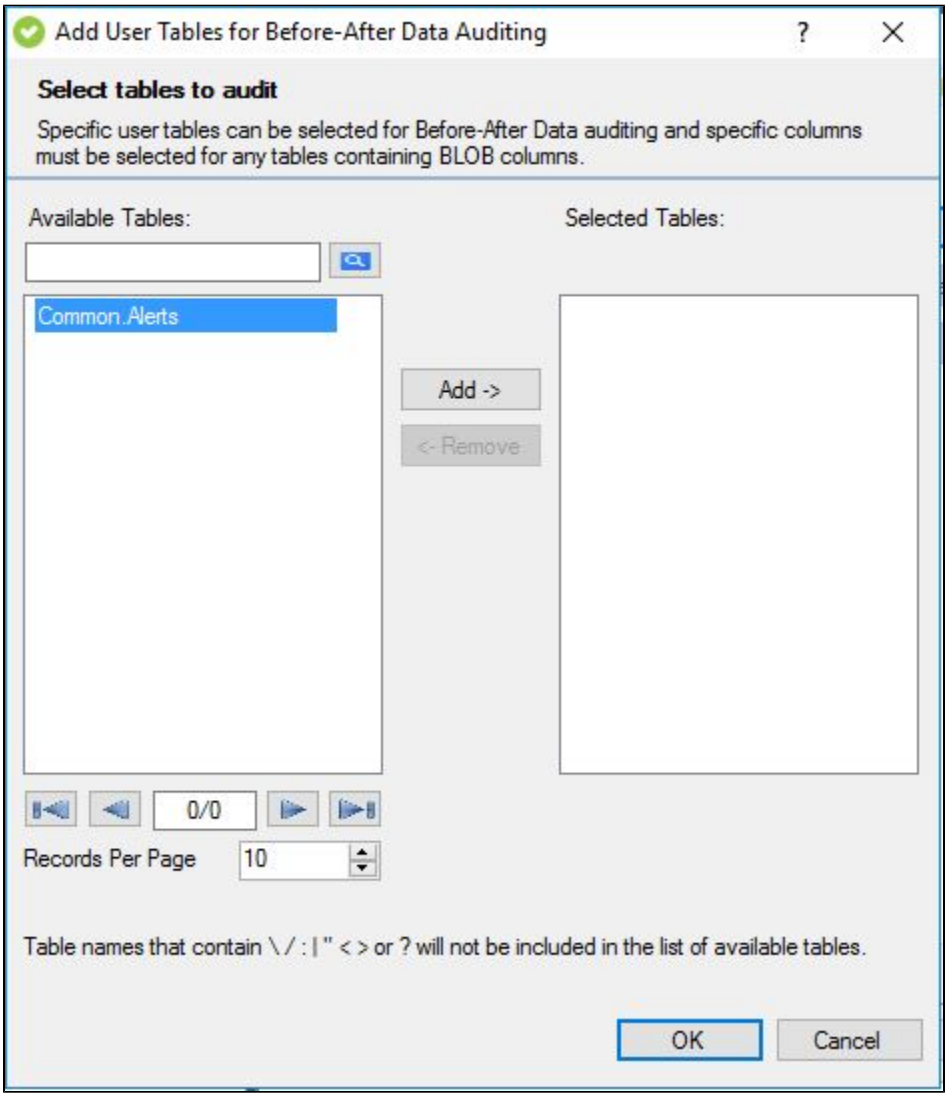
Add User Tables window - Before and after data

The Add Users Tables window allows you to specify which user tables you want to audit for before and after data. This setting is available when you choose to audit before and after data at the database level.

Select the user tables you want to audit, and then click **Add**.



If a table contains BLOB data, then you must specify which columns you want to audit. Tables that include BLOB data are displayed in bold type. Note that IDERA SQL Compliance Manager does not support auditing BLOB data types. BLOB data includes:

- binary
- images
- ntext
- text
- varbinary
- XML code
