

Database Properties - Add Trusted Users window

The Add Trusted Users window allows you to specify which trusted users you want to audit. You can specify trusted users by individual SQL Server login names or by the fixed server role. When you specify a fixed server role, the SQL Compliance Manager Agent collects events generated by any login who is a member of that role.

 When you designate trusted users, consider limiting your list to a few specific logins. This approach optimizes event processing performance and ensures you filter the intended accounts.

Select the logins or fixed server roles you want to audit, and then click **Add**. You can specify both individual logins and roles.

Add Trusted Users

Show Logins/Roles from:
Server Roles

Available Logins/Roles:

- Bulk Insert Administrators
- Database Creators
- Disk Administrators
- Process Administrators
- Security Administrators
- Server Administrators
- Setup Administrators

Add

Add to Trusted User List:

- Bulk Insert Administrators

Remove

Note: Specifying large numbers of trusted users may have a performance impact on the audited SQL Server.
