

Object Activity Report

The Object Activity Report lists all activity for specified objects performed on specific databases. Use this report to audit mass data movement or database object activity, such as SELECT or UPDATE, across multiple databases.

The screenshot displays the IDERA SQL Compliance Manager interface. On the left, a sidebar titled 'Audit Reports' contains a list of reports. The 'Alerts / History' section is selected, and the 'Object Activity' report is highlighted with a green border. The main area shows a grid of report thumbnails, each with a description. The 'Object Activity' report is selected, and its description is shown: 'List all activity for specified objects.' Below the grid, there are sections for 'Reporting Services' and 'View Deployed Reports'.

Alerts / History	
DML Activity (Before-After) Lists DML events for which before and after data is available.	Host Activity List all activity for specified hosts.
Integrity Check List all integrity check violations.	Login Creation History List all login creation activity.
Login Deletion History List all login deletion activity.	Object Activity List all activity for specified objects.
Permission Denied Activity Lists all activity for which permission was denied.	Sensitive Column Activity Lists every time a sensitive column was accessed.
Server Activity Report Card Shows Server Activity Report Card.	Server Login Activity Summary Lists login statistics per server with per login details.
Table-Data Access by Rowcount Shows details of Table/Data Access by Rowcount.	User Activity History List all activity for specified users.
User Login History List all login activity for specified users.	

Reporting Services

Deploy Reports
Deploy reports and linked reports to Reporting Services 2005 or later.

View Deployed Reports
View deployed reports hosted by Reporting Services 2005 or later.

A filter can include a list of wildcards, separated by commas, where a wildcard is a string, which may contain asterisks. The following parameters are specific to the selected report and enable you to filter the data to include in the report.

Available actions

Server Instance

Allows you to select a registered instance on which you want to report. Select **ALL** to report on all instances.

Databases

Allows you to select or type the name of one or more databases on which you want to report.

Login

Allows you to select the login from the drop down list of available logins. Select **ALL** to report on all logins.

Start Date

Allows you to select the start date for the range from which you want to report.

End Date

Allows you to select the end date for the range from which you want to report.

Start Time - Hour

Allows you to select the exact starting hour of the day for the range from which you want to report.

Start Time - Min

Allows you to select the exact starting minute of the day for the range from which you want to report.

Start Time - AM/PM

Select between AM or PM from the drop down list to configure the Start Time for Each Day range from which you want to report.

End Time - Hour

Allows you to select the exact ending hour of the day for the range from which you want to report.

End Time - Min

Allows you to select the exact ending minute of the day for the range from which you want to report.

End Time - AM/PM

Select between AM or PM from the drop down list to configure the End Time for Each Day range from which you want to report.

Schema

Allows you to type the name of one or more schema on which you want to report.

Target Object

Allows you to type the name of one or more target objects on which you want to report.

Application

Allows you to type the name of one or more applications on which you want to report.

Host

Allows you to type the name of one or more hosts on which you want to report.

Category

Allows you to select the category type on which you want to report. Select from a category type to filter on from the drop down menu.

Event

Allows you to type the name of one or more events on which you want to report.

Show SQL

Select between True or False from the drop down menu to filter the report by SQL Text.

Privileged Users Only

Select between True or False from the drop down list to report on Privileged Users only or to report on All User types.

Run Report

Click this button to Run the report.

Default columns

Database

The Database column displays the name of the database where the event was captured.

Schema

The Schema column displays the name of the event's schema.

Target Object

The Target Object column displays the name of the target object.

Details

The Details column provides details of the captured event.

Event

The Event column displays a description of the event captured.

Login

The Login column displays the login name of the user who performed the event.

Host

The Host column displays the name of the host.

Application

The Application column displays the name of the application used to capture the event.

Time

The Time column displays the date and time when the event was captured.

SQL

The SQL column when set to True, provides the SQL Statement for the captured event.
