

# Upgrade SQL Server on the Collection Server

You can upgrade the SQL Server software running on the existing Collection Server when you use your current IDERA SQL Compliance Manager installation to audit instances running on multiple versions of SQL Server at the same time in a single environment. Use the following checklist and instructions to successfully upgrade the SQL Server software.

## Upgrade checklist

<input checked="" type="checkbox"/>	<b>Follow these steps ...</b>
<input type="checkbox"/>	Determine whether you want to upgrade to the latest version of SQL Compliance Manager. To verify whether you are running the latest version, click <b>Check for Updates</b> on the Help menu.
<input type="checkbox"/>	Choose the appropriate <a href="#">upgrade strategy</a> for your environment and your auditing needs.
<input type="checkbox"/>	Ensure your Windows logon account has administrator permissions on the Collection Server computer and sysadmin rights on the SQL Server instance hosting the Repository.
<input type="checkbox"/>	Back up your trace directories, especially the Collection Server Trace Directory.
<input type="checkbox"/>	Run the Microsoft SQL Server Upgrade Advisor utility on the target instance. For more information about upgrading SQL Server, see <a href="#">Upgrade Advisor</a> on the <a href="#">Microsoft web site</a> .
