

Configure your deployment

After initially installing SQL Diagnostic Manager, use the following configuration tasks to help you get the most out of SQL Diagnostic Manager:

- [Add your SQL Server instances](#)
- [Configure console options](#)
- [Connect to a SQL Diagnostic Manager Repository](#)
- [Set your Repository grooming schedule](#)
- [Use tags to organize your monitoring environment](#)
- [Use custom counters to track metrics](#)

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more > >](#)
