

## Connect to Repository window

The Connect to Repository window allows you to connect to a different installation of the IDERA SQL Compliance Manager Repository. You can type the name of the SQL Server instance that hosts the Repository databases or browse for the instance. ***If the target SQL Server instance is not listed***, verify that the instance is available.

Specify the appropriate SQL Server instance, and then click **OK**.

**SQL Compliance Manager** audits all activity on your server. [Learn more > >](#)
