

# Change general properties

The **General** tab of IDERA SQL Secure contains basic information about your audited SQL Server, including the instance name, the SQL Server version, snapshot information, and security and auditing information.

Property Group	Description
SQL Server	<p>Contains the name of the computer hosting the SQL Server instance belongs to, the SQL Server instance name, version number, edition, if replication is enabled, and whether the sa account password is empty.</p> <p>Note that when viewing information for Azure SQL Database, this section includes a field for whether geo-replication (readable secondary databases) is enabled, but does not include the sa account password field.</p>
Operating System	<p>Contains the basic information of the operating system: server name, Windows OS, and if Server is Domain Controller</p> <p>Note that when viewing information for Azure SQL Database, this section does not include a field for whether the server is a domain controller.</p>
Snapshot	<p>Contains basic snapshot information including the time and date of the current snapshot, the snapshot status, and when the last successful snapshot was taken.</p>
