

# Filegroup Space Full (Size) alert

The Filegroup Space Full (Size) alert provides the amount of disk space, in megabytes, currently used by the database as the sum of all the files within the filegroup.

SQLdm raises this alert based on the database metrics collection interval specified in [Server Properties](#). You can also use advanced alert options such as filters to exclude specific filegroups or databases from alerting results.

Advanced Alert Configuration - Filegroup Space Full (Size) ? ✕

Alert Suppression

Alert Filters

Filter out objects for which you don't wish to receive alerts.

Which filegroups would you like to exclude from alerts?

Exclude...

use semicolons to separate names; use % for wildcards

Which databases would you like to exclude from alerts?

Exclude...

use semicolons to separate names; use % for wildcards

OK

Cancel

You can access advanced filters by clicking **Advanced > Alert Filters** when setting the thresholds for your Filegroup Space Full (Size) alert.

The Filegroup Space Full (Size) alert is disabled by default.
