

# Threads Settings

Using the Threads option, you can customize the timeframe for the currently running queries based on their execution time.

## How To Change?

Users can change the Threads option by clicking the Threads Settings icon. A new window displays where we can set the time for currently running queries in decreasing order.

**THREADS SETTINGS**✕ Close✓ Save

Queries taking

or more seconds

Queries taking execution time less than

seconds

**Auto-adjust height for processlist view?** ☒

If enabled Monyog will auto-adjust the threads view's height, else threads will be displayed with a fixed height scrollable view.

**Set Default**

An option is given to select the view for the processlist window. You can either select to have a fixed height or dynamic (full screen) height for your processlist window.

SQL Diagnostic Manager for MySQL agentless and cost-effective performance monitoring for MySQL and MariaDB.
