

Managing users

SQL Enterprise Job Manager allows you to define three types of user roles:

- Administrator
- User
- Read-only

While Administrators can access to all SQL Enterprise Job Manager features, Users and Read-only users have restrictions to some pages and functionalities within the product. Go to [User roles in SQL Enterprise Job Manager](#), to find more information.

SQL **Enterprise Job Manager** monitors and manages your SQL Server agent jobs. [Learn more](#) > >
