

# Release Notes

SQL Business Intelligence Manager provides agentless monitoring of the servers and services for SQL Server Analysis Services, SQL Server Reporting Services, and SQL Server Integration Services. Get insight into over 140 metrics including OS counters, service performance counters, and system availability. Dashboard views display data across the entire BI environment and enable you to drill down to find details relating to performance and availability issues. In addition, configurable alerts keep you notified of the state of your BI environment so you can take corrective action as needed.

To get a quick glimpse into the features, fixed issues, and known issues in this release of SQL BI Manager, review the following sections of the Release Notes:

- [Learn about key new features in this release.](#)
- [Review issues fixed by this release.](#)
- [Review previous features.](#)
- [See known issues in this release.](#)
- [Review previous known issues.](#)

SQL **Business Intelligence Manager** identifies issues within the SQL BI environment to help optimize BI service performance. [Learn more](#) > >
