

What is IDERA SQL Secure?

IDERA SQL Secure is a security analysis solution that identifies SQL Server security violations and ensures security policies are enforced. Find out who has access to what and identify each user's effective rights across all SQL Server objects. Alert on violations of your corporate policies, monitor changes made to security settings, and provide security audit reports as well as recommendations on how to improve your security model.

SQL Secure tells you who has access to what on your SQL Server databases. [Learn more](#) > >
