

View database object properties

All objects in Data Source Explorer contain properties as they relate to the DB Optimizer application.

DB Optimizer Object Properties are viewed via the Properties dialog. The dialog is accessed by right-clicking the object in Data Source Explorer.

Properties for TORLABSCORCL (MOVIES) (Oracle 10.2.0.1)

Security credentials

User name: MOVIES

Password: ••••••

Connect as: normal

☒ Auto-connect (Saves and encrypts password)

☐ Allow trusted connections

Test Connection Apply

OK Cancel

To view Data Source Explorer object properties:

The properties are accessed by right-clicking a data source in Data Source Explorer. The dialog displays properties with regards to Configuration and SQL Filters.

The Configuration node provides information about the parameters used to initially define the data source during the data source registration process. For more information on these values and how to modify them, see [Register data sources](#).

The SQL Filter node enables a developer to place filters on data source objects that appear in the Database Explorer. For more information, see [Filter database objects](#).
