

Creating profiling reports

After profiling a data source, you can create an HTML or PDF Report of the profiling session. You can choose the details to include in the report.

1. At the top right corner of the Profiling tab, click the **Export Report** button.

The **Export a Profile Report** dialog appears.

The 'Export a Profile Report' dialog box is shown. It has a title bar and a close button. The main content area is titled 'Export a Profile Report' and contains the following sections:

- Report Title:** A text box containing 'Data Source Profile Report'.
- Report Description:** A text box.
- Profile Report Options:** A section with a dropdown menu set to 'SQL'. Below it are three checked options: 'SQL', 'Report only the top 25 rows', and 'Include detail information for top 25 rows'.
- General Report Options:** A section with three sub-sections: 'Format' (radio buttons for PDF and HTML, with PDF selected), 'Layout' (radio buttons for PORTRAIT and LANDSCAPE, with PORTRAIT selected), and 'Paper Size' (radio buttons for Letter (8.5 x 11, 216 x 279), Legal (8.5 x 14, 216 x 356), and A4 (8.3 x 11.7, 210 x 297), with Letter selected).
- Use default export location:** A checked checkbox.
- Export location:** A text box containing 'C:\Users\npollard\AppData\Roaming\Idera\dboptimizer\workspace' and a 'Browse...' button.

At the bottom of the dialog are three buttons: a help button (question mark icon), an 'Export' button, and a 'Cancel' button.

2. Enter a **Report Title** and **Description**.
3. In the **Profile Report Options** area, click the triangles to expand the options.

4. Select your options, enter the location for the report, and then click **Export**.
A report in PDF format will resemble the following:
