

How to create DDML documents

To create DDML documents

1. Log on to the server where the PMDB FocalPoint is installed using the PMDB user.
2. Go to the Precise root directory.
3. Open the following file:
`products/dbms/files/tables_definition/pw_cd_db_entities.xml`
4. Create all database entities you want to add to the PMDB using DDML.
5. Save and close the file.
6. Run the following command:
Windows: `products\pw\bin\install_customer_schema.bat`
UNIX: `./products/pw/bin/install_customer_schema.sh`
7. Stop and restart the PMDB FocalPoint.
