

Manage SQL Diagnostic Manager

The Administration blade of SQL diagnostic manager allows you to [control access to all the information that SQL Diagnostic Manager collects](#), letting you designate the servers and databases that each of your SQL Diagnostic Manager users can view or edit. In addition to controlling access, you can also [add](#) or [import](#) custom counters to monitor in SQL Diagnostic Manager and even [keep track of key actions performed in your SQL Diagnostic Manager environment](#).

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
