

Install the SQL Safe Backup Agent

You can remotely deploy the SQL Safe Backup Agent from the Management Console to SQL Server instances across your enterprise.

To install a SQL Safe Backup Agent:

1. In the navigation pane, click **SQL Safe Agents**.
2. Right-click on the computer in question in the tree pane.
3. Click **Install SQL Safe Backup Agent** from the context menu.
4. Choose whether you want to enable or disable the option for installing SQL Safe Agent Extended Stored Procedures. You can also include the Backup Service Install Log.
5. Click **OK**.
