

# New features and fixed issues

IDERA SQL Secure provides the following new features and fixed issues.

## 4.4 New features

- The **Snapshot Comparison** report settings now include a checkbox that allows the report to show the object comparison based on:
  - Current logic.
  - Updated logic to ignore restored objects that are identical to the previous snapshot.
- The **Snapshot Comparison** report now shows a more detailed view of the user level access changes that occurred between two different snapshots.

## 4.4 Fixed issues

- The **Snapshot May Be Missing Data** security check was incorrectly reported for SQL Server 2016 and SQL Server 2017. This is now fixed.
