

Managing products in the IDERA Dashboard

The IDERA Dashboard hosts IDERA products that register with the Dashboard. Click the **Manage Products** option in the Administration view to open the respective window.

In the **Manage Products** window you can perform the following actions on registered products:

Edit a Product

To edit a product, select it from the Products list. The Dashboard displays the settings for the selected product on the panel to the right. Make the necessary modifications and click **Save**.

MANAGE PRODUCTS

SEARCH: Search products by name here

Register a Product

Product	Version	Registered	Location	Credentials

Delete a Product

To remove a product, select it from the Products list and click **Delete** on the panel to the right. A confirmation dialog displays; click **Yes** to remove or **No** to cancel.

If you want to uninstall the IDERA Dashboard, make sure to delete all registered products before uninstalling.

Migrate Product

Allows you to migrate the registered product to a different IDERA Dashboard. Select the product from the Products list and click **Migrate product**.

Fill in the requested information and click **Migrate**.

Register a Product

Register SQL Diagnostic Manager in your IDERA Dashboard. Click **Register a Product** to display the configuration settings.

When the Register a Product to IDERA Dashboard window displays, first select the product installation location (Local or Remote) and fill out the information as follows:

Local	Remote
-------	--------

1. In the **Product** field enter the product name, SQLdm (As it shows in the image below).
2. In the **Display Name** field enter any name you want. Choose a unique display name to help you distinguish different instances of the same product.
3. Enter the **Port** number used by SQLdm Rest Service. By default, the port number is 5170.
4. Under Product Administrator enter your credentials.
5. Type all the requested information and click **Register**.
