

Advanced query statement view

SQL Diagnostic Manager provides you the ability to view individual SQL Statements or to view Query Signatures. Query statements are presented exactly as they are collected by the Query Monitor Trace. Query statements provide all the detail you may need to diagnose a specific problem with a query.

Once you identify a potential problem statement, you can drill into the Query Details view by clicking the  icon.

QUERY STATEMENT (823) [Options](#) Show Top [100](#) | [200](#) | [All](#)

Query ID	Query Name	SQL Text	Event Type	Occurrences	Total Duration (s)	Total CPU Time (ms)	Total Reads	Total Writes	Total Time (ms)
Query Statement: Query #1		exec xp_ms...	Stored Proce	1	6,132	0	100	0	0
Query Statement: Query #2			Proce	1	26,842	0	100	0	0
Query Statement: Query #3			Proce	1	63,126	0	100	0	0
Query Statement: Query #4			Proce	1	122,349	0	100	0	0
Query Statement: Query #5			Proce	1	5,128	0	100	0	0
Query Statement: Query #6			Proce	1	5,128	0	100	0	0
