## **Configure SQLDM Mobile and Newsfeed email settings**

In order to receive notifications from the SQLDM Mobile and the Newsfeed service, you must configure how the IDERA Newsfeed Platform should communicate with your Mail Server.

## Available email settings

In the Email Settings you can perform the following changes:

- Name of your Mail Server.
- Port that the SQLDM Mobile & Newsfeed Service should use to communicate with the Mail Server (by default, port 25).
- How long (in seconds) the IDERA Newsfeed Platform should wait for a reply from the Mail Server before timing out (by default, 15 seconds).
- Whether the Mail Server requires authentication, and which credentials should be used for authentication.
- The name and the email address that the SQLDM Mobile & Newsfeed Service should use when sending notification emails.

To configure your email settings, follow these steps:

- 1. Start the IDERA Newsfeed Platform Manager console.
- 2. Click the Notification Server tab.
- 3. Specify the appropriate values.
- 4. To ensure SQLDM Mobile can connect to your Mail Server, click Test.
- 5. Click Save.

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
